Session 8 Lecturer Notes

Assessment 1 Announcement 0 - 10 mins

The hand in link for assessment 1 is now live, spend some time going over the hand in process. **Note** there's also a submission guide that's live on myCourse, you should briefly go over this. **This is the last task that will have to be referenced in the learning log**

Introduce the importance of usable forms 10- 15 mins

Encourage the students to work along with you. Grab the source code for the unusable form demo (link on page 3). It's worth mentioning that most form elements are inline.

Introduce wire frames 15-20 mins

We're going to go through the process of turning an unusable form into something that resembles the wire frame.

\<fieldset\> and \<legend\> elements 15-30 mins

Show how to group together form elements using `<fieldset>` and `<legend>` . I showed the students one example and got the to complete the form.

\<p\> tags can be used to create separate lines 30-35 mins

Get the students to place the inputs and their associated labels on new lines using `<p>` tags.

CSS for Forms 35-50 mins

As per the notes, complete the form layout using the CSS techniques mentioned.

Kick of the task for the week 50 mins +++
